VOLUNTARY DISPOSAL

IGLUS

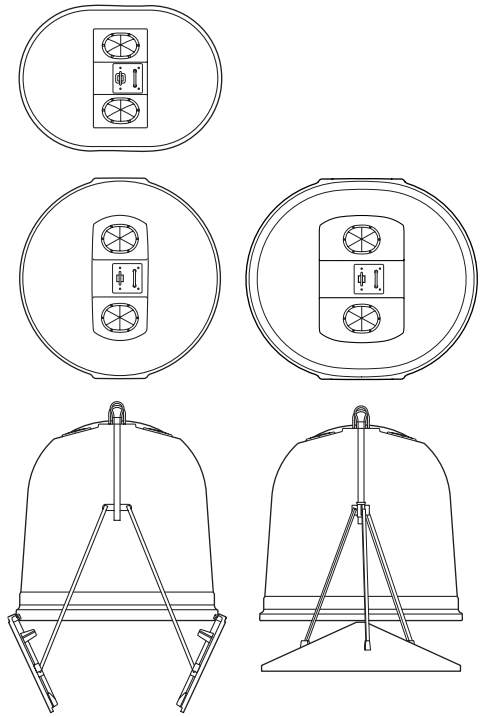
Waste collection banks of classic design

MATTIUSSI® environmental

VOLUNTARY DISPOSAL

IGLUS

Waste collection bank for voluntary sorted waste disposal. Low visual impact thanks to its low-key design. Basic characteristic: the useable capacity is the same as its nominal capacity to optimize the use of space.
Product certified according to EN 13071-1:2008 standards.



TECHNICAL FEATURES
Body and bottom material:
- 100% recyclable linear polyethylene, mass coloured and UV resistant

Manufacturing process:
- rotational moulding

Frame:
- polyethylene monocoque body without joints and welds, with differentiated thicknesses, upper side round-shaped to increase resistance
- steel internal handling structure, hooks and hinges
- polyethylene base — with two swing doors or cone-shaped— reinforced with steel braces
- all steel parts are hot-galvanized according to EN ISO 1461 standards

Insertion apertures, variants:
- two opposite apertures on inclined top
- 200x250 mm splinter-proof rubber rosettes
- hooded aperture with rubber protection
- 210x390 mm aluminium hinged gate with return spring
- 270x360 mm gate for large items, with lock

Opening of bottom, variants:
- two downward swinging doors hinged to the sides of the body and moved by rigid bars with asymmetric closing system for exact coupling of the splinter-proof bases
- cone-shaped bottom moved by rigid central bars anchored to the double-hook emptying system

Emptying:
- by means of double-hook standard crane

Markings:
- decals with waste collection graphics and instructions

Standard colours:
- light blue, pastel yellow, pastel green, white, blue, yellow, green
- other colours on request for minimum quantities

Colours

Model	Bottom	Nominal capacity	Useful capacity	Width	Depth	Height with hook	Height without hook	Empty weight	Admissible weight
