

Street MK2

with Fill Level and Access Control Technology

The Taylor Street MK2 Waste Container Housing is a great way to make areas look tidy, encourage segregation of waste and secure containers. To enhance the Street MK2, you can also add technology to this unit.

Part of
Egbert Taylor

Street MK2

The Taylor Street MK2 creates a highly visible focal point for waste disposal and recycling whilst avoiding the public's negative connotations of waste.

With a modular design that enables creation of distinctive recycling bays and adjustable feet allow for an accurate and stable installation, the Taylor Street MK2 is easy to use, cost effective and aesthetic.

Great on its own but even better when combined with technology. The technology we have can be retrofitted to existing units or added to new streets.

netBin nLok Access Control

The netBin nLok system identifies and autonomously grants access to authorised collectors only. Control and manage 1000s of electronically secured units from one central management platform.

netBin nPod Fill Level Sensor

Never collect an empty bin again, thanks to our latest fill level monitoring sensors - capable of communicating to waste collection operatives your bin or containers waste fill levels, sending an alert in the event of a fire and much more.

Colour options

Door panels available in these classic RAL colour standards:

Black (9001)	White (9016)
Ivory (1015)	Yellow (1023)
