

# Continental™

## Fork Pockets - External

Adding fork pockets to your Continental™ containers allows for the safe and easy movement of containers around large sites. For operators with heavier waste requirements and the standard use of fork lift trucks this simple enhancement can speed up waste transportation and allow for more effective waste collection points on site.

Part of

# Egbert Taylor

# Continental™ Fork Pockets - External

Adding External Fork Pockets to our Continental™ Containers ensures easy movement of the containers around site. This versatile container can be adapted to meet your requirements. No wonder its the winner of a World Industrial Design Award.

The Continental™ 1100 with External Fork Pockets is EN840 compliant and will give you exceptional lifetime value with limited downtime, unlike plastic and other alternative steel commercial trade bins.

Internally welded seams stop water penetration, preventing the corrosion that plagues less well made metal waste containers.

## Features

- Heavy Duty Base
- Also available as**
- Narrow Internal Fork Pockets
- Wide Internal Fork Pockets

## External Fork Pockets
