

> Double Station HC5/SC5

Bigbelly's Double Station combines one HC5 is a smart, solar-powered, compacting waste station along with a SC5 standard capacity station. Both HC5 & SC5 units are equipped with sensors that monitor and report on fullness levels, along with various alerts such as the door has been left open or if the hopper has jammed. The double Station harvests solar power to compact waste and communicate its real-time status. The enclosed hoppers ensure total waste containment. Double stations and can be customised based on waste stream, options, and accessories.
