

# Refurbishment

With savings of up to 60% compared to buying new, a Taylor refurb is the most cost effective way to maintain and manage your bin fleet.

No matter the age, size or model, Taylor will collect bins from your depots before delivering them to our dedicated in-house refurbishment facility where our team of skilled engineers bring them back to life - regardless of condition.

# Refurbishment

Refurbishment is becoming increasingly popular and with savings up to 60% compared to buying new, it's the most cost effective way to maintain your bin fleet.

We take pride in our standards, and as the market leading manufacturer we are able to fit genuine spares, designed to work with existing Taylor products first time, every time ensuring the best possible performance for your bins.

Containers are fully inspected prior to the refurbishment process with minor repairs carried out as standard.

All bins are lightly shot blasted (to remove old paint yet still protect the galvanised coating), repaired, repainted and have castors, lids and logos replaced to return them back to use looking as good as new.

**Egbert Taylor has developed its Refurbishment programme in order to make our customers' bin and container fleet management as cost effective as possible – and all without compromising on quality.**

From fire damage and dents to graffiti and structural damage, our team of skilled engineers then restore each unit, including replacing standard Taylor castors, lids, logos and providing a new, painted finish.

As part of the refurbishment programme, customers can convert their bins to include towing capability and a variety of lid designs and colours.

For a cost effective and sustainable way in which to manage your bin fleet, contact customer services on +44 (0)1299 251333

## With our Refurbishment programme, customers receive:

- A ten point inspection of each bin submitted prior to them being returned
- Peace of mind that each unit has been restored by an in-house team of skilled Taylor engineers
- Reassurance that their newly refurbished units bear all the hallmarks of a genuine Taylor product for up to 40 per cent of the cost of a new container
